

Objective: Unite Divided America and Promote The PeaceCraft.U.S Resolution

The objective of the American Split ARG game is to unite a divided America and promote The PeaceCraft.U.S Resolution before the United Nations. In this immersive and engaging game, players navigate through challenges and tasks in five categories: Love & Romance, Racism, Sexism, Homo/Transphobia, and The Threat of A.I.

Each player must complete at least two challenges from each category to gain a deep understanding of the societal issues at hand and foster empathy and inclusivity. The game encourages players to take meaningful actions, share their experiences, expand their knowledge, and explore alternative perspectives.

As players progress through the game, they earn points for completing challenges and accumulate resources. These points can be redeemed for prizes such as Amazon gift cards or unique items that reflect urban and suburban lifestyles.

The ultimate goal of the game is to advocate for The PeaceCraft.U.S Resolution, a concrete plan to achieve global peace. Players use their accumulated points to create impactful content, whether through social media posts, videos, or petitions, that generate widespread support and engagement. The player who garners the highest number of views or petition sign-ups for their PeaceCraft.U.S post becomes the victor of the game.

By participating in the American Split ARG, players actively contribute to building a more unified and peaceful society. They have the opportunity to inspire others, drive positive change, and showcase the power of collective action in addressing critical issues.

Are you ready to embark on this immersive journey and make a difference in the world? Unite Divided America and join us in promoting The PeaceCraft.U.S Resolution before the United Nations!
